

KEY VOCABULARY

Pollution	When gases, smoke and chemicals are introduced into the environment that makes it harmful for humans, animals and plant
Litter	Litter is any kind of trash thrown in small amounts, especially in places where it doesn't belong.
Recycling	taking a material like the plastic in a plastic bottle putting it through a process so the material can be used again instead of being wasted

Have a think about these 4 images. What are they? Can they be reused for anything? What could you reuse them for?

If you see these types of litter around school - find a bin to put them in, or recycle them if you can!

Different Types of Litter in School

We can recycle:

paper
plastic
glass
food
wood

Not all rubbish can be put together. We have to separate it into different types. Some we can recycle (use again).

All of these are recycling signs! If you see one on any packaging, you know it is recyclable!
